

E50 Snow Foam Car Shampoo

E50 Snow Foam car Shampoo has been developed for use by professional autocare technicians for use with pressure wash and M-Teknologi snow cannons®. The concentrated formula forms a highly dense foam blanket to maximise cling time and effortlessly loosen and lift stubborn dirt, grime and road debris from your paintwork for a clean and shining vehicle.

Professional Kitchen Solutions

FEATURES

- ✓ pH neutral formulation, won't remove any previously applied layers of wax, polish & ceramic coatings
- ✓ Thick foam reduces the risk of scratches and swirl marks.
- ✓ Highly concentrated – Use only 50ml to generate 10 layers of foam on a standard car
- ✓ Easy application: Apply snow foam – wait for up to 10 minutes – rinse and wipe off effortlessly
- ✓ Streak Free
- ✓ Long lasting anti-static formula helps to repel dust

DIRECTION

- 1 Before you start, ensure that the bodywork and wheels are cool to the touch and out of direct sunlight.
- 2 Pre-rinse the car to remove road dust and wet the surface.
- 3 Add 50ml product to 500ml water in the M-Teknologi Snow Cannon foaming bottle.
- 4 Adjust foam gun settings as required to increase or reduce foam.
- 5 Spray M-Teknologi Snow Foam onto the vehicle, starting at the bottom, ensuring all exterior surfaces are covered, including glass and wheels.
- 6

Leave Snow Foam blanket time to dwell and loosen dirt for up to 10 minutes, although do not allow it to dry on.

Finally, rinse thoroughly with clean water from the bottom up.

Dry with M-Teknologi Microfiber Towels

Use M-Teknologi E80 Final Shine for additional shine and protection

ACTIVE INGREDIENT

Sodium Laureth Sulfate, Cocamide DEA, Dye, Preservative, Fragrance.

Method of use	Fill ratio	K83	water	concentration
Normal wash	1:40	1L	40L	25000ppm
Very dirty vehicle	1:20	1L	20L	50000ppm

WARNING

- Causes serious eyes irritation.
 - Wash hands thoroughly after handling.
- Do not use in direct sunlight.
- Optimum results are obtained by drying with a chamois leather or equivalent to prevent water-spotting.
- Do not allow foam to dry onto paintwork surface as streaking may occur.
